

17 Physics

- Students will be able to understand and recognise the fundamentals and concepts of the basic principles of Physics.
- Students will be able to gain expertise on relevant theoretical and computational techniques.
- Students will be able to solve problems on physical phenomenon qualitatively and quantitatively in a methodical and consistent way.
- Students will be able to acquire knowledge on experimental techniques and gain hands-on training regarding handling of equipments related to various experiments.
- Students will be able to find out paths for research work and career opportunities in various core and applied domains in Physics.
